- Playgrounds

### Seeding Rates

New Turf Applications: 2 – 3 lbs/1000 sq ft.  
(1 – 2 kg/100 sq meters)

Repairs of Existing Turf: 1/2 – 1 lb/1000 sq ft.  
(1/4 – 1/2 kg/100 sq meters)

**This is a certified PVP variety of  
Seeds West, Inc.**

# Bermuda Triangle

## Bermudagrass

### Positioning/Management

Featuring- Certified MOHAWK, SULTAN, and SYDNEY Turf-type Bermudagrasses The Bermuda Triangle is not a mystery anymore! Three of our better-seeded varieties have been blended together to provide an excellent turf with wide adaptation. These top performing varieties have improved turf density, color and moderate cold tolerance. For turf that stands up to the demands of today's turf professionals and the best of the best, seed Bermuda Triangle Blend.

### Establishment and Maintenance

Bermuda Triangle Blend should be planted when soil temperatures are consistently above 65 F (18° C) in full sun on well-drained soil. Care must be taken not to cover the seed with too much soil – no more than ¼" (1.91 cm) covering the seed is recommended. Soil moisture around the seed must be maintained for about 1 to 2 weeks. Under ideal conditions, germination may begin within 10 to 14 days; allow 14 to 18 days for completion. Full coverage may be attained in 4 to 6 weeks, when planting early or late in the season, more time may be needed for establishment. Mowing may begin when grass is 1/3 taller than desired mowing height. It is recommended that no more than 1/3 of leaf blade be removed per mowing. Dormant bermudagrass may be overseeded for year round color, but is not generally recommended on turf less than 6 to 8 months old
