Plains Bristlegrass
Buffalograss
Engelman Daisy
Mexican Hat
Plains Coreopsis

### Planting Rate

**We recommend planting at:** 1 Lb. per 1000 sq ft.  
45 Lbs. per acre

### Why our Llano Pecos Mix?

The Llano Pecos Mix is a unique blend of grasses inspired by the diverse landscapes of Texas, from the tallgrass prairies to the Chihuahuan desert. This blend captures the beauty and transition between these ecosystems, creating a stunning and ever-changing pastureland. The mix consists of hardy and drought-tolerant grass varieties that can thrive in warmer and drier climates. It offers a mid-height early successional ladder, rebuilding soils and providing smooth transitions from short to tall grasses. The deep-rooted grasses in the blend contribute to water quality and groundwater concerns. Additionally, the grass seed is treated with a root inoculant for enhanced plant growth. The Llano Pecos Mix is a perfect choice for those seeking a visually captivating landscape that can withstand changing climate conditions and contribute to a sustainable future.
