

Pantego[®] activates root growth

Unlock nutrients with our *Simply Vital* biologicals.

Pantego[®] row crop formulations feature the industry's only free-living yeast soil amendment. This phosphate-solubilizing yeast not only increases the availability of vital nutrients like phosphorus, but also supports extensive root growth to unlock and transport nutrients and water to the plant tissue.

- **Pantego[®]** – Features the Locus AG novel phosphate-solubilizing yeast
- **Pantego[®] Duo** – Combines the Locus AG novel phosphate-solubilizing yeast with an endophytic fungus
- **Pantego[®] Thrive** – Combines the Locus AG novel phosphate-solubilizing yeast with a beneficial bacteria

Available in a Dry, Box Applied Formulation

Formulated for These Row Crops
Corn, Wheat, Cereal
Featured Proprietary Strains
<i>Wickerhamomyces anomalus</i>
CarbonNow[®] Program Eligibility
Pantego [®] Duo

How Pantego[®] Works

Improves Soil Activity

Microbial strains increase activity in the root zone around the plant.

Solubilizes Phosphate

Improves plant-available phosphorus, which increases nutrient use efficiency.

Boosts Yields

Increases more bushels per acre, which leads to more revenue generated.

A simply vital choice. Get started now.
